

Important Measurements:
Diagram shows important dimensions of any CDRIVE system.

Alignment

The alignment of the belt in a straight line is crucial to the smooth operation of any CDRIVE™ system. The important measurements of a CDRIVE™ system are shown in the diagram at the right. You will need a bottom bracket and 4 arm 104 mm bolt circle diameter crankset combination which provides you with a chainline which matches your chosen rear hub.

Chainline Targets

The following list is a list of chainline targets of some standard internally geared hubs:

Shimano Alfine Nexus 8	46mm
Shimano Nexus 7	43mm
Shimano Inter 3	46.5mm
SRAM S7 SRAM T3	48mm
Sturmey Archer 3	48mm
Surmey Archer 5	45mm
